CLAIMS

1. (original) A method for use with first and second metadata streams with respect to a video stream, the first metadata stream time-coded with respect to the video stream and the second metadata stream not time-coded with respect to the video stream, the method comprising the steps of:

aligning the second metadata stream with the first metadata stream;

adding time codes to the second metadata stream, based on the alignment;

searching for proper names within the second metadata stream;

finding faces within the video stream;

matching faces with proper names; and

placing the matched faces and proper names into a reference library.

2. (original) The method of claim 1 wherein the video stream is news footage, wherein the first metadata stream is closed captioning for the hearing impaired, and wherein the second metadata stream is a separate description of the news footage.

3-21. (canceled)

22. (original) A method for use with a metadata stream with respect to a video stream, the metadata stream time-coded with respect to the video stream, the method comprising the steps, performed by a computer, of:

searching for proper names within the metadata stream;

finding faces within the video stream;

matching faces with proper names; and

placing the matched faces and proper names into a reference library.

- 23. (original) The method of claim 22 wherein the video stream is news footage, wherein the metadata stream is closed captioning for the hearing impaired.
- 24. (presently amended) A method for use with a metadata stream with respect to at least one video stream, the metadata stream time-coded with respect to the at least one video stream, the method comprising the steps, performed by a computer, of:

searching for proper names within the metadata stream;

finding faces within the at least one video stream;

matching faces with proper names;

placing the matched faces and proper names into a reference library; and

for a selected proper name, generating a list of locations within the at least one video stream associated with that selected proper name.

- 25. (original) The method of claim 24 wherein the video stream is news footage, wherein the metadata stream is closed captioning for the hearing impaired.
- 26. (original) The method of claim 24 further comprising the step of communicating the list of locations to a rights management system.

27-29. (canceled)
